PROFESSIONAL SUMMARY

First-year Computer Science student (B.Tech 2024–2028, CGPA 8.0+) with hands-on experience building responsive, user-facing web applications using HTML5, CSS3, and JavaScript. Delivered three end-to-end projects — an interview-preparation tool, a bug-tracking application, and a personal portfolio — all live on GitHub. Founder of EDUEXCHANGES, a student ed-tech platform. Seeking a Frontend Developer internship to contribute clean, accessible UI code within a product-driven team.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), Flexbox, CSS Grid, DOM Manipulation, LocalStorage API, Responsive Web Design
Languages: JavaScript, Java (OOP), C++ (OOP, STL), C, SQL
Tools: Git, GitHub, VS Code, Browser DevTools
CS Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

PROJECTS

InterViewAce — Interview Preparation Platform *2025*

Tech Stack: HTML5 · CSS3 · JavaScript (ES6+) · Flexbox

- Built a browser-based interview-prep tool with categorized technical Q&A sets and a timed self-assessment mode, letting users practice under realistic conditions.
- Used DOM manipulation and JavaScript event listeners to dynamically render questions, capture answers, and display score feedback — no libraries, no backend.
- Designed a fully responsive layout with CSS Flexbox that adapts across mobile and desktop screen sizes.

Bug Issue Tracker — Client-Side Issue Management Tool *2025*

Tech Stack: HTML5 · CSS3 · JavaScript (ES6+) · LocalStorage API · CSS Grid

- Developed a full CRUD bug-tracking app where users can create, update, filter, and close issues — all persisted in the browser via LocalStorage with no server required.
- Implemented status workflows (Open → In Progress → Resolved) and real-time filtering using vanilla JavaScript.
- Laid out the dashboard with CSS Grid for a scannable, column-based interface that mirrors professional issue-tracking tools.

Personal Portfolio Website *2025*

Tech Stack: HTML5 · CSS3 · JavaScript · Flexbox

- Designed and coded a responsive portfolio from scratch featuring smooth-scroll navigation, CSS keyframe animations, and a contact section.
- Structured markup with semantic HTML5 elements (header, main, section, footer) to improve readability and basic SEO.

Operating Systems Simulation Suite *2025*

Tech Stack: C++ · OOP · STL

- Implemented Banker's Algorithm (deadlock avoidance), Round Robin CPU scheduling, and First Fit memory allocation in C++ with a modular, class-based architecture.
- Verified outputs against standard edge cases, reinforcing core OS concepts: process scheduling, resource allocation, and memory management.

EXPERIENCE

Founder & Technical Lead · **EDUEXCHANGES** *Aug 2025 – Present*

- Launched a peer-reviewed engineering mini-project marketplace covering Physics, Chemistry, and Electronics — designed, built, and operated solo from concept to live platform.
- Managed UI/UX design, content curation, visual branding, and digital promotion as the sole founder.

Software Development Job Simulation · **Deloitte via Forage** *Oct 2025*

- Completed hands-on tasks in software development and architecture design modelled on real consultant workflows, applying agile principles to simulated business problems.

EDUCATION

B.Tech — Computer Science & Engineering · **Medi-Caps University, Indore** *Aug 2024 – May 2028*

CGPA: 8.0+ | Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Web Development

CERTIFICATIONS & ACHIEVEMENTS

- C Programming Certification — IIT Bombay (via EduPyramids) · Score: 70% · April 2025
- Active LeetCode practitioner — algorithmic problem solving in JavaScript and C++
- Head of Social Media — IFPC Club, Medi-Caps University
