PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student (B.Tech, 2024–2028) with proven experience in full-stack web development using Java (Servlets, Hibernate, Spring MVC, Struts), Python (Django), SQL, and frontend technologies. Founder of EDUEXCHANGES — a student-focused ed-tech platform — with additional leadership experience as Head of Social Media at IFPC Club, Medi-Caps University. Skilled in building production-grade web applications, J2EE enterprise systems, REST APIs, and OS algorithm simulations. Certified in C Programming by IIT Bombay. Passionate about software engineering, agile development, and delivering impactful technical solutions.

TECHNICAL SKILLS

Programming Languages: Java (Advanced — Servlets, Lambda, Generics, Java Beans), Python, C++ (OOP, STL), C (IIT Bombay Certified), SQL
Frontend Development: HTML5, CSS3, JavaScript (ES6+), JSP, Responsive Web Design, UI/UX Design, Visual Branding
Frameworks & Backend: Spring, Spring MVC, Struts (MVC), Hibernate (ORM), Django, Java Servlets, J2EE Architecture
Databases: MySQL, SQLite, SQLyog, Database Normalization (3NF / 4NF), Relational Algebra, CRUD Operations
Data Structures & Algorithms: Arrays, Linked Lists, Trees (BST, AVL), Graphs, Heaps, Hashing, Sorting & Searching Algorithms
Developer Tools & IDEs: Git, GitHub, VS Code, Apache NetBeans, Jupyter Notebook, Anaconda, DBSQLite, Linux, MS Office
Core CS Concepts: OOP, Operating Systems (Scheduling, Memory Management, Deadlocks), DBMS, Computer Networks

EDUCATION

Bachelor of Technology — Computer Science and Engineering | **Medi-Caps University, Indore** | *Aug 2024 – May 2028*
Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Web Development, Discrete Mathematics

Higher Secondary Certificate (Class 12) — M.P. Board | **Madhya Pradesh Board of Secondary Education** | *2024*
Percentage: 85.6%

Secondary School Certificate (Class 10) — M.P. Board | **Madhya Pradesh Board of Secondary Education** | *2022*
Percentage: 82.5%

WORK EXPERIENCE

Founder & Technical Lead | **EDUEXCHANGES** | *Aug 2025 – Present*

- Conceptualized, built, and launched a peer-reviewed engineering mini-project marketplace covering Physics, Chemistry, and Electronics (ECE), cultivating an active student learner community.
- Managed the full technical documentation pipeline and content distribution strategy, improving resource discoverability and practical learning outcomes for engineering students.
- Directed end-to-end visual branding, UI design, and digital promotional campaigns, increasing platform visibility and user engagement metrics.
- Owned sole product strategy, content curation, and operational workflows as a solo technical founder.

Technology Job Simulation — Software Development | **Deloitte (via Forage)** | *Oct 2025*

- Completed industry-aligned practical tasks in software coding, full-stack development, and architecture design modelled on real consultant workflows.

- Applied agile development principles and architectural patterns to solve simulated business challenges, strengthening professional software engineering skills.

PROJECTS

Charge Fuel — Dynamic EV & Fuel Services Platform | *Jan 2026 – Feb 2026 Tech Stack: Django, Python, SQLite*

- Built a full-stack Django web platform enabling on-demand EV charging, petrol, and diesel delivery services for end-users.
- Implemented user authentication, booking management, and SQLite data persistence with a clean MVC architecture.

Bank Ease — J2SE Banking Portal | *Jul 2025 – Aug 2025 Tech Stack: Java, Servlets, JSP, Struts, MySQL, SQLyog*

- Developed a dynamic web banking platform for retired army officers, with full Java Servlet/JSP backend, Struts MVC framework, and MySQL for reliable session management and data persistence.
- Implemented secure login flows, transaction management, and role-based access control for a real-world client use case.

Scheme Setu — Government Schemes Awareness Platform | *Jun 2025 – Jul 2025 Tech Stack: JSP, HTML5, CSS3*

- Built a responsive awareness website enabling farmers, students, and citizens to discover and understand relevant government schemes, improving public access to policy information.
- Designed clean UI/UX for easy navigation across multiple scheme categories with accessible language and layout.

Eco Ride — J2EE Cab Services Platform *Tech Stack: Struts, Hibernate, Java, Servlets, JSP, MySQL, SQLyog*

- Designed and deployed a multi-tier enterprise cab booking application using Struts MVC framework and Hibernate ORM, with secure end-to-end booking workflows and MySQL data persistence.
- Implemented MVC architecture with Hibernate entity mapping and connection pooling for scalable, maintainable enterprise code.

Crop Health Scanner Simulation *Tech Stack: Java Servlets, HTML5, CSS3, JavaScript, MySQL*

- Engineered a full-stack web application using Java Servlets to process real-time environmental data and generate dynamic crop health diagnostics.
- Designed a responsive frontend dashboard for real-time visualization of crop condition reports with modular, reusable backend logic.

Operating Systems Simulation Suite *Tech Stack: C++, OOP*

- Implemented Banker's Algorithm for deadlock avoidance, Round Robin CPU scheduling, and First Fit memory allocation using C++ with full OOP architecture.
- Validated simulation correctness against edge cases; demonstrated mastery of process synchronization, resource allocation, and memory management.

CERTIFICATIONS & ACHIEVEMENTS

- C Programming Certification — IIT Bombay (via EduPyramids), Score: 70%, April 2025
- Data Structures & Algorithms — Advanced proficiency in Trees (BST, AVL), Graphs, Heaps, and Hash Tables
- Competitive Programming — Active LeetCode practitioner focused on Java-based algorithmic problem solving and optimization
- Creative Writing — Skilled in Shayari and poetic writing; leveraged for digital content creation and platform branding at EDUEXCHANGES
